PROMOTIONAL ITEMS FROM WENGER

Agile, up-to-date and at home in the world's cities – but always with its traditional Swiss roots in mind. This is Wenger today. Wenger's bags and luggages are reliable, functional and well designed, and they capture the spirit of the times. They are designed for people who travel a lot and who therefore want to count on a Swiss brand at a reasonable price.

WENGER

PROTECT OUR ENVIRONMENT!

Sustainability is a highly important value for us, and we are committed to using environmentally friendly materials that contribute to reducing the environmental footprint of our products. Therefore, we proudly utilize innovative materials such as jute, RPET (recycled PET), recycled canvas and paper, stainless steel, bamboo, wood, and cork.

The use of these materials allows for a reduction in environmental impact, as many of them come from renewable sources or are made from recycled materials. Recycled materials like RPET or recycled paper, for example, reduce the need for new raw materials and minimize waste in landfills.

These materials are generally of excellent quality and durability, leading to a longer lifespan compared to certain single-use plastic or paper alternatives. This contributes to reduced consumption and increased product durability, ultimately lowering the amount of waste generated.

Additionally, the use of sustainable materials can positively impact the reputation of companies and brands. It showcases a company's commitment to environmental consciousness and responsible business practices, appealing to environmentally conscious consumers and clients.

Protection of the environment is of utmost importance to our company, and we strive to ensure that our packaging is completely free from plastics. It is a key focus for our products not only to represent high quality but also to be sustainable, which is why we use exclusively recycled and recyclable paper in the production of our boxes.

Each box is crafted with a unique design, providing not only an eco-friendly but also an aesthetically attractive appearance. The various boxes complement each other beautifully, making them perfect for sale as sets.

RECYCLED PAPER

Recycling paper plays an important role in protecting the environment by reducing the need for logging and waste disposal. Recycled paper is produced with lower energy consumption and emits fewer harmful substances into the environment. Recycling allows for multiple uses of paper, which can improve the environmental condition in the long term.

The process of recycling paper involves the following steps: collection, cleaning, shredding, wetting, filtering, and pressing. During the production of recycled paper, paper pieces are mixed with water and chemicals to facilitate filtering and pressing. The paper pulp is evenly distributed during pressing and then dried to create the recycled paper.

INKLESS PEN

Inkless pens are a new generation writing tool that represents a revolutionary approach compared to traditional ink pens or ballpoint pens. As the name suggests, these pens do not require either ink cartridges or ink for use.

The uniqueness of inkless pens lies in a special composition layer located at the tip of the pen, which interacts with the microstructure of the paper. When we press the tip of the pen onto the paper, it leaves a mark. This process is similar to drawing with a pencil, but with inkless pens, there is no need to sharpen the tip, and the writing or drawing is much smoother and more uniform.

The advantage of inkless pens is that we don't have to worry about refilling ink. Inkless pens write without leaving a trace, so we don't have to fear ink stains or smudges. The pens are also durable, as the composition layer has a long lifespan and doesn't wear out as easily as traditional pen tips.

GEL INK & SEMI-GEL INK

Gel-based ballpoint pens, or gel ink pens, are popular writing instruments used for writing and drawing. They come in two main types: traditional gel ink pens and semi-gel ink pens. Traditional gel ink pens store ink in a reservoir or cartridge and dispense it using a ball or cylinder. Semi-gel ink pens typically mix the ink with a special substance for a more liquid and easy writing experience.

Gel ink pens are comfortable, easy to use, and provide a smooth writing experience. The ink dries quickly, reducing the likelihood of smudging. They offer a wide range of colors for vibrant writing and are great for detailed work.

Overall, gel-based ballpoint pens are versatile and practical tools for clean and smooth writing. They are favored by those seeking style and comfort in their writing instruments.

RUBBERIZED PEN

Rubberized metal pens are elegant and practical writing instruments that combine functionality and style. The body of these pens is usually metal covered with a rubberized coating. This rubberized surface provides a comfortable grip and stable control while writing.

The metal base color can be brought out through a pattern or text engraved in the body of the pen, which gives the pen an elegant and clean look.

SUBLIMATION

Sublimation emblemization enables the transfer of high-quality and durable emblems, patterns, or images onto various promotional items' surfaces.

This process relies on the use of sublimation inks, which transition into a gas state under the influence of heat, embedding themselves deeply into the material of the objects. As a result, smooth and long-lasting emblems are created, characterized by excellent quality and resistance to wear.

INDUCTIVE CHARGING

Inductive charging is a charging technology that allows electrical devices to be charged without physically connecting them to a charger. The basis of inductive charging is the charging current created by an electromagnetic field. When we place the device on the stand, the stand creates an electromagnetic field that passes through the charging circuit in the device and charges it. The advantage of inductive charging is that it is easy to use, we do not need to use a separate charging cable, and it is usually faster than traditional charging methods.

SOLAR POWER

Solar power banks are equipped with photovoltaic panels that convert solar energy into electricity. The battery stores the energy, which can then be used to charge devices when needed.

Solar power banks are small and easily portable, making them ideal for travel, hiking, or anywhere that access to an electrical grid is not available. With a solar power bank, you can prevent your devices from running out of power and ensure that you always stay connected.

BLUETOOTH

Bluetooth audio devices allow wireless transmission of audio data from a source device (such as a smartphone, tablet, or computer) to a receiver device (such as a speaker or headphones). Using Bluetooth technology, the desired devices are able to connect to each other without the need for physical connectivity.

As a result, Bluetooth audio devices are very convenient and portable, making them very popular for listening to music, transferring data between devices, or even in home theater systems.

SUBLIMATION

Using the sublimation technique for branding promotional items is its ability to display graphics over large surface areas seamlessly. This allows businesses to create visually striking and attention-grabbing promotional products that make a strong impact on their target audience. The versatility and scope for creativity with sublimation make it a popular choice for companies aiming to elevate their brand visibility through unique and captivating advertising gifts.

ORGANIC COTTON

Organic cotton is grown without synthetic chemicals or pesticides, using methods that promote biodiversity and lower environmental impact. It relies on natural processes like crop rotation and composting to maintain soil fertility and control pests. By avoiding harmful chemicals, organic cotton protects farmers, consumers, and the ecosystem. Its cultivation also reduces water consumption and pollution, making it a sustainable choice. Consumers opting for organic cotton support fair trade practices, ensuring farmers receive fair wages and work in safe conditions. Overall, organic cotton is an eco-friendly and ethical alternative, contributing to a greener and healthier textile industry.

OEKO-TEX

To achieve Oeko-Tex certification, textile products must comply with restrictions on harmful substances, including chemicals such as formaldehyde, azobenzene, chlorinated chemicals, etc. These substances are checked based on ecological and toxicological tests.

Oeko-Tex standards cover the entire production process, including textile materials, fabrics, and finished products. Oeko-Tex certification ensures that the end product is safe for human health and does not contribute to environmental harm.

RECYCLED COTTON

Recycled cotton, also known as reclaimed cotton, offers a sustainable alternative to traditional cotton. It is created from post-consumer and post-industrial cotton waste, eliminating the need for new raw materials. Recycling cotton reduces water and energy consumption while minimizing environmental impact. Choosing recycled cotton products contributes to a greener and more responsible fashion industry, supporting a circular approach to reduce textile waste and conserve resources.

Toilet bag La Rochelle

Our toilet bag recommendation! This is the right one! Made of robust nylon - inside with ample space, there is a transparent zipper compartment, a stretch band with 5 loops, 3 big net compartments and 2 net compartments with a metal hook, which you can take out by means of a Velcro fastener, for hanging up in the shower for e.g. shampoo or shower gel. The bag provides a 270 degrees surround zipper and one further metal hook for hanging it up. This is practical and convenient! We will print your logo on the front of the bag.
